

School Health Management

V6.3.1 Release Notes

THE FOLLOWING SCHOOL HEALTH MANAGEMENT UPDATES ARE NOW AVAILABLE.

This release addresses items within the EHR and Health Portal.

- Care plans and Letters has a new feature to access an unsaved care plan, letter or a template in Notifications when you lose connection with the server. If there is a number indicated on the bell in the upper right corner of the program, this indicates you have an item to retrieve. Click the bell, then click on the unsaved item to continue your work.

- A new report, C-278 COVID-19 Isolation/Quarantine data provides data for the *Date of approval to return to school*. The date range criteria is based on Isolation/Quarantine start date in the COVID-19 Case Management event.

- The student's enrollment status has been included into the CSV and PDF for the COVID-19 Questionnaire Dashboard.
- COVID-19 section on person profile for the *Been in contact with someone who has COVID-19* data will show blank if the check box is not checked.
- Event expand link for COVID-19 Case Management and Screening events will display event data.
- Static/Text Dropdown list for Student/Person → Enrollment Status has been added to enable Admin users to add statuses to the list for other enrollment types, like Hybrid and Remote. This value can then be added into the import to properly reflect the student's enrollment status.
- Merge Person has been corrected to enable the user to choose the *Person to merge from*, as the primary immunizations record once merged.
- Student Letter print button is working, to enable the user to print from the letter screen.
- When scheduling a future date for a student calendar, no longer shows an error.
- The date field has been corrected to no longer show a previously selected date, when using the date picker.
- Pump Name field has been added to Diabetes Care section of the Medical Procedure maintenance page. This field will be displayed in the administration screen for visibility to users.
- When clicking the Save button in Group Sessions, users will no longer be logged out of the program.
- Health Portal Users search criteria has an added search field of User Name for another added search type.
- Health Portal Questionnaire History is read only, to prevent the assumption that the user can edit the responses.
- When performing a search on the Portal User search page, users will no longer be logged out of the program.
